

Would you like to be in a workgroup for a research study on Vietnamese-speaking adults and family members? We are looking for community members to partner with us!

ImPaCT aims to understand ways to improve healthcare for Vietnamese-speaking older adults with memory problems (**ImPaCT-Dementia**) and adults with advanced cancer (**ImPaCT-Cancer**) and their families by learning about their experiences.

Bring your skills

- Fluency in Vietnamese and English
- Sharing in the identities & lived experiences of Vietnamese-speaking communities
 - Personal or professional experience with dementia and/or cancer
 - Qualitative research

Contribute by

- **Developing** materials (interview guides, study flyers)
 - **Translating** study materials
- **Recruiting** and enrolling participants
- **Conducting** study interviews

Time Commitment: About 4 - 8 hours per month

Compensation: \$50/hour

Project Duration: About 10-12 months
