

# Let's Connect: Research and Community Collaboration Opportunities

## About the ImPaCT Program

Improving Palliative Care Together (ImPaCT) aims to understand how to improve care and support for people with serious illnesses such as dementia and cancer whose primary language is not English. Our goal is to understand the barriers and facilitators to promote high-quality, linguistically and culturally appropriate care for individuals facing these illnesses from Somali-, Spanish-, Chinese-, or Vietnamese-speaking communities and their families.

### Ways to Get Involved

#### Join the Workgroup

Take part in the Somali workgroup to support research activities such as developing and translating materials, conducting interviews—ensuring community voices are centered in the research

#### Participate in a CBO interview

If you are a Somali community-based organization professional, we welcome you to share your experience in providing services and programs to your community

**All participants will receive compensation for their time**
